Preface of the series editors **5**

Preface of the author **7**

1. Globular Amphora communities: A matter of connectivity and transformation **13**

1.1 Definitions 13

1.1.1 Transformation 14

1.1.2 Connectivity and globalisation 15

1.1.3 Mobility 15

1.1.4 Habitus 15

1.2 Globular Amphora perspectives 16

1.2.1 Globular Amphora and globalisation 16

1.2.2 Globular Amphora and separation: Identity construction? 17

1.2.3 Globular Amphora: Translocation and networks 18

1.3 Methods 18

1.4 Integration into previous research 19

1.4.1 Regional and transregional studies 20

1.4.2 Chronologies 20

1.4.3 Settlement patterns and economy 21

1.4.4 Graves 21

1.4.5 Distribution model 21

1.5 Distribution across space and landscape 21

2. Space and decoration: Patterns of Globular Amphorae **23**

2.1 Research questions and methodology: General comments 23

2.1.1 Research questions 23

2.1.2 Methods 24

2.1.3 Sources 26

2.2 The database: Recorded ceramic finds 27

2.3 Investigations of vessel forms 28

2.3.1 Vessel types and individual observations 28

2.3.2 Vessel types: Univariate and multivariate analyses 43

2.3.3 Results and interpretation 46

2.4 Investigations on decoration techniques 48
2.4.1 Decoration techniques and individual observations 48
2.4.2 Correspondence analysis and spatial distribution of decoration techniques 56
2.4.3 Results and interpretation 58
2.5 Investigations on decoration motifs 58
2.5.1 Decoration motifs and individual observations 58
2.5.2 Decoration motifs: Univariate and multivariate analyses 72
2.5.3 Results and interpretation 77
2.6 Comprehensive analysis 78
2.6.1 Multivariate description of Globular Amphora ceramics 78
2.6.2 Interpretation 80

3. Absolute chronological dating of the Globular Amphora phenomenon 85

3.1 Methodological procedure 85
3.1.1 Approach 87
3.2 The database 87
3.3 Regional investigations with Bayesian dates 88
3.3.1 Western GAC 89
3.3.2 Central GAC 114
3.3.3 Eastern GAC 186
3.4 Overall results of Bayesian dating 195
3.4.1 Beginnings 195
3.4.2 Decoration change 199
3.4.3 Disappearance 200
3.4.4 Modelling 201
3.4.5 Interpretation: Spatial distribution pattern 201
3.5 Overall consideration of the individual radiometric dates 202
3.5.1 Mapping of the individual ^{14}C data 202
3.5.2 Spatial-temporal distribution according to hexagonal surfaces 209
3.6 Summary and consequences 214

4. The Middle Elbe-Saale region: A mosaic of diverse cultural and social practices around 3000 BCE 217

4.1 The Central German Bernburg society: Chronology and interpretation 217
4.1.1 Basic chronological trends 219
4.1.2 Chronology of the graves 219
4.1.3 Chronology of the chamber graves 222
4.1.4 Chronology of the settlement pits 222
4.1.5 Overall results: The chronology of a ceramic style 229
4.1.6 Interpretation: The Bernburg style in the multicultural environment of the Central German Late Neolithic 231
4.2 The Central German Globular Amphora societies: Chronology and interpretation 234
4.3 Economy and settlement patterns: A complex mosaic 237
4.3.1 Bernburg subsistence economy 237

4.3.2 Settlement distribution 239
4.3.3 Settlement types 241
4.3.4 Pit huts, posts and houses 243
4.3.5 Settlement patterns and chronology 245
4.4 Patrilocality and admixture 246
4.5 Consequences: Symbiotic relationships 248
4.6 A Western GAC pattern? 249
4.7 Conclusions 250

5. Environment, economy and nutrition of the Globular Amphora communities 253

5.1 The environment of the GAC 253
5.1.1 Topography, soils and climate 253
5.1.2 Vegetation and vegetation changes 257
5.1.3 Summary 259
5.2 Economic data from the Western GAC 260
5.2.1 Central Germany and the Southwest Baltic regions 260
5.2.2 Bohemia/Moravia 268
5.3 Economic data from Kuyavia and Lesser Poland 269
5.3.1 Flint raw material supply and tool use 280
5.3.2 Examples of local economies: Rocks, Janowice and Wilostowo 280
5.3.3 Summary 281
5.4 Eastern Globular Amphorae 282
5.5 Economic catchment areas? Ceramic transport as a proxy 282
5.6 Overall interpretation 287

6. Discernible domestic activities: Settlement patterns and population densities 289

6.1 Western GAC 289
6.1.1 Central Germany and Northwest Germany 289
6.1.2 Bohemia/Moravia 298
6.2 Central Group 301
6.3 Summary and interpretation 315
6.4 Spatial patterns of GAC domestic sites 317
6.5 Population densities 322

7. Scales of Mobility: The historical dimension of the Globular Amphora phenomenon 323

7.1 Kinship and ancestry of GAC individuals: The database 323
7.2 Genetic continuities between Middle and Late Neolithic Groups and the GAC 326
7.3 Regional variances 326
7.3.1 Western Germany 328
7.3.2 Middle Elbe-Saale region 328
7.3.3 Bohemia 329
7.3.4 Northern Poland 329
7.3.5 Lesser Poland 330
7.3.6 Western Ukraine 330

7.4 The Central European Globular Amphora societies and the emergence of the Corded Ware societies 331
7.5 Kinship structures and marriage practices 332
7.6 Scales of sedentism and mobility of a phenomenon with new ritual practices: the Globular Amphora societies 336
8. Separation and hybridisation on a global scale: The Globular Amphora networks 337
8.1 A model 341
